Note: These alternative estimates were produced with the standard methodology, except that they did not incorporate special censuses and challenges. The estimates are based on Census 2000 and were created without incorporation or consideration of the Census 2010 results.

The April 1, 2000 Population Estimates base reflects changes to the 2000 Census population

from the Boundary and Annexation Survey (BAS) and other geographic program revisions. It also reflects changes from the Count Question Resolution program. An "(X)" in the 2000 Census field indicates a locality that was formed or incorporated after the 2000 Census. Additional information on these localities can be found in the Geographic Change Notes (see <http://www.census.gov/popest/about/geo/changes.html>).
